

## AFI TRAINING

AFI is committed to promoting safe working practice. Through comprehensive platforms training and customer education we aim to ensure best practice for work at ANY height! As an registered approved training provider for the most recognized industry qualifications in the world, AFI offers a wide range of courses to suit your individual needs from machine operators to managers and supervisors.

### IPAF TRAINING

AFI are recognised as one of the leading approved IPAF training providers in the UK. Operating nationwide from either your own premises (subject to site requirements) or our own extensive network of depots spread throughout the UK.

<b>Operator Training</b>	<b>Demonstrator Training</b>	<b>MEWPs for Managers</b>
A mix of theory and practical training, this course is designed to enable operators to manoeuvre, drive and position the machine safely and proficiently. It can be undertaken on scissor lifts, booms or trailer mounted platforms.	This course includes a test paper on legal requirements and provides delegates with the skills to familiarise operators with their responsibilities and demonstrate safe operating procedures.	This one day training course is designed to instruct supervisors and managers how to prepare for, and safely co-ordinate various types of Mobile Elevating Work Platforms (MEWPs) within their control.
<b>Safe Loading and Unloading</b>	<b>MEWP Harness Training</b>	<b>Push Around Vertical (PAV)</b>
Delegates will learn how to carry out inspections and risk assessments as well as how to correctly position the vehicle, load and unload in a safe manner. The course has a minimum machine category requirement of scissor lifts and self-propelled booms.	Identification of appropriate protection equipment and use, correct condition and fitting of harness are examined within the course which covers a range of MEWPS. However, it can be tailored to offer candidates achievement testing on specific machines – please remember to highlight requirements when booking.	A mix of theory and practical training, this course is designed to enable operators to manoeuvre and position the machine safely and proficiently. It can be undertaken on Push Around Verticals.

### TRAINING - OPERATOR TRAINING & FAMILIARISATION: YOUR LEGAL OBLIGATIONS

It is the employer's responsibility to ensure that all operators using access equipment are adequately trained and familiarised to comply with current Health & Safety Legislation.

1. TRAINING

Our IPAF and AFI Training courses include classroom theory, followed by a written test paper, together with practical sessions and assessment.

2. FAMILIARISATION

Those who intend to use Mobile Elevating Working Platforms ("MEWP") with characteristics of weight, height, width, length or complexity which differ significantly to the training they have received should ensure that they receive a familiarisation to cover the differences. Machine specific familiarisation should follow on from basic training and cover: manufacturer's instructions and warnings, features of the specific model, control functions, safety devices and emergency lowering procedures. All of the above are to be found in the information supplied with the machine.

Familiarisation is available from AFI (subject to charge) or alternatively you may wish to consider having a qualified IPAF demonstrator(s) within your workforce to improve safety and ensure that operators are fully aware of different machine safety systems and emergency lowering procedures.

For further information Contact our Training division on 08707 871511 for details and costs

### PASMA TRAINING

#### Mobile Access Tower

In addition to our IPAF training, AFI is also able to provide PASMA certified training.

This one day scaffolding course is designed to enable delegates to assemble, dismantle and correctly position the tower proficiently and safely for the task in hand. On successful completion of a practical assessment and Tower Inspection Report a PASMA Identity Card and Certificate will be issued.

For more information please visit [www.afi-uplift.co.uk/pasma-training.asp](http://www.afi-uplift.co.uk/pasma-training.asp)

### LADDER TRAINING

#### The Ladder Association

As an approved LMA training provider, AFI is subject to ongoing annual audit, to ensure we meet the high standards demanded by the LMA.

For more information please visit [www.afi-uplift.co.uk/lma-training.asp](http://www.afi-uplift.co.uk/lma-training.asp)

Delegates will learn to assess appropriate product types for use and how to safely locate and use ladders and step ladders. On successful completion, delegates will receive a LMA Certificate and photo card as proof of competence, which is valid for 5 years.
